Introducing

The NEUBIE Device

The NEUBIE: The Ultimate in Neuromuscular Re-Education

Neuro Biological Electrical Stimulation also known as the NEUBIE System is changing the PT game. It's the next generation of therapy that can scan your body, identify where there's a break in the connection between the muscles and nerves and then fix the body unlike anything you've ever experienced in PT. By investing in the best technology on the planet, iMOVE PT helps our patients get better faster. Less than 1% of the clinics in North America offer this ground breaking technology.

What Sets The NEUBIE Apart:

The Nervous System is Key: It controls every single function in our body. The NEUBIE is able to tap into the nervous system with laser accuracy.

Your Physical Therapist can immediately and positively affect the disconnect between your nervous system and muscles, bringing your body back into a balanced, pain-free state, ON THE VERY FIRST VISIT.

How the NEUBIE works: It uses pulsed direct current (DC) as opposed to alternating current (AC) with unique effects on the body's tissues to promote healing and unique effects on the nervous system that help practitioners create correct communication signals. This often breaks down years or decades of dysfunction in just a few sessions.

Using DC has numerous, positive biological effects. DC fields have been shown to accelerate the body's own physiological processes of healing, repair, and regeneration and to have unique effects on the nervous/neuromuscular system.

Treatments with the NEUBIE are active rather than passive. Traditional e-stim treatments have patients lying down, passively accepting the current and not moving. In contrast, the DC signal protocols actually require movement, resulting in lasting positive changes in Neuromotor pathways. This allows for optimal, eccentric contractions, which has been proven to be a major factor in effective rehabilitation.

The NEUBIE Results That Matter:

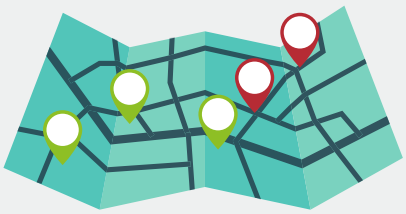
Heal Faster
Typical results include increasing recovery times by up to 70%.

Get Fitter & Stronger
Accelerate fitness, build muscle, bust through plateaus and burn fat in fewer sessions with less stress on your ligaments, tendons and joints.

Optimize Health
By enhancing your autonomic nervous system health, you can reach your full potential via improved immune function, sleep, mood and focus.

How The

NEUBIE Device Works



1

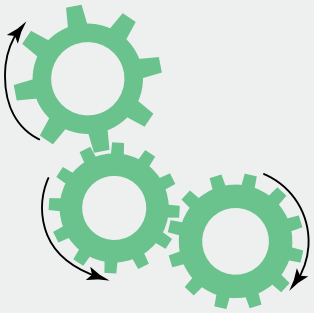
Mapping (with 100% accuracy)

The key first step to getting game-changing results with the NEUBIE is to identify specific areas where there is a disconnect between the nerves and the muscles.

2

Treatment (you move, you improve)

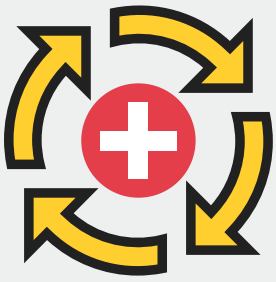
The NEUBIE varies from other e-stim therapy in that you must perform functional movements during treatment. This reprograms the nervous system.



3

Success (automatic and immediate)

Once the neuromuscular re-education is performed with the NEUBIE, most patient conditions note significant improvement in only 1-4 sessions.



4

Lasting Relief (restored function)

The NEUBIE's ability to reprogram the connection between the nerves and muscles helps the nervous system function properly with lasting relief.
